

## Alliance for Low Input Sustainable Turf

A-LIST is a non-profit industry initiative with a mission to foster development of turfgrass varieties that perform under reduced inputs and levels of management, and also exhibit additional traits such as drought and heat tolerance, leading to a more sustainable environment. A-list approved varieties have been through a rigorous set of tests under reduced input trials. A-List approved mixes and blends must contain a minimum of 65% A-List approved varieties to carry the A-List tag.

**SUSTAINABLE  
VARIETY**

**REDUCED  
INPUTS**

**HEAT  
TOLERANCE**

**DECREASED  
WATER USE**
