

COMPOSITE[®] TECHNOLOGY

LebanonTurf's patented Composite Technology[®] fertilizer manufacturing process produces a superior fertilizer by fusing premium forms of nitrogen with phosphorus, potassium and select micronutrients. This revolutionary process creates a unique homogeneous granule with improved particle dispersion and integrity, along with a higher measurable amount of nitrogen activity.

- 2135593 - Country Club 10-18-18 64% Meth-Ex Fe / Mg / Mn (150)
- 2135742 - Country Club 16-4-8 Ammoniacal Fe (150)
- 2140590 - Country Club 26-0-5 52% Meth-Ex (150)
- 2135763 - Country Club 27-0-5 64% Meth-Ex (150)
- 2135573 - Country Club 13-25-12 Starter All Mineral (Standard)
- 2135595 - Country Club 19-0-9 55% Meth-Ex Fe / Mg / Mn (Standard)
- 2129307 - Greenskeeper 20-0-8 57% Meth-Ex Fe (Standard)
