Overseeding: 3-4 lbs. |

Alliance for Low Inter Sustainable Turf

A-List is a non-profit industry initiative with a mission to foster development of turfgrass varieties that perform under reduced inputs and levels of management, leading to a more sustainable environment. Lebanon Turf is a founding member of A-List. A-LIST has established a voluntary evaluation program including metrics like water conservation, reduced fertility, traffic, heat, and drought stress tolerances, all with no fungicide or insecticide applications. Results in NTEP trials are also considered. Products that meet the acceptance criteria can utilize the A-LIST Approved symbol in their marketing. Trials are under way to evaluate Kentucky bluegrass, Tall fescue, perennial ryegrass, and Fine fescue varieties.

These LebanonTurf Turfgrass varieties have been approved by A-List. They are found in our A-list approved blends and mixes which require a minimum of 65% A-List varieties to carry the A-List approved tag.

Using A-List approved varieties assures you of a more sustainable turfgrass lawn, sports field, or golf course for the future!

PennMulch® Seed Accelerator

PennMulch® Seed Accelerator is a pelleted seeding mulch developed and patented by Penn State University and made from recycled newsprint. PennMulch® reduces drying, improving germination 36% with better stand uniformity and density. PennMulch® contains a full rate of starter fertilizer eliminating the need for another application and insuring that your seeds get off to a great start.

Seeded Soil

PennMulch at application. Apply at 65 lbs per 1,000 sq. ft.
