

# Country Club<sup>®</sup> FERTILIZER

# 28-7-14

### GUARANTEED ANALYSIS

Total Nitrogen (N) .....	28%
6.2% Ammoniacal Nitrogen	
4.3% Nitrate Nitrogen	
17.5% Urea Nitrogen	
Available Phosphate (P <sub>2</sub> O <sub>5</sub> ) .....	7%
Soluble Potash (K <sub>2</sub> O) .....	14%
Iron (Fe) .....	0.1%
0.1% Chelated Iron (Fe)	

Derived From: Ammonium Phosphate, Potassium Nitrate, Sulfate of Ammonia, Urea, Iron EDTA..

Chlorine (Cl) not more than..... 2.0%

**NOTICE: This product contains the secondary micronutrient iron. Iron may stain concrete surfaces and should not be applied on dry or water dampened concrete and should be removed from these areas promptly by sweeping or blowing. Do not wash off with water.**

Apply only to actively growing turf. Do not exceed 3.2 lbs. of total nitrogen per 1,000 sq. ft. annually.

**In Maryland and Virginia:** This fertilizer contains phosphorus and may not be used for lawn maintenance on turf in the states of Maryland or Virginia except when

- 1) Providing nutrients to specific soils and target vegetation as determined to be necessary in accordance with a soil test that was conducted by a laboratory\* performed no more than 3 years before the application;
- 2) Establishing vegetation for the first time, such as after land disturbance, provided the application is conducted in accordance with the recommended application rates established by the State; or
- 3) Re-establishing or repairing a turf area.

\*In Maryland, the laboratory must be identified under Section 8-803.7 of the Agriculture Article, Annotated Code of Maryland.

**In New Hampshire:** This fertilizer contains phosphate. In New Hampshire, phosphate fertilizers may only be used for turf maintenance in golf courses, parks, athletic fields, and sod farms.

Country Club 28-7-14 is specifically formulated for use on golf course putting greens and other turfgrass areas. It is completely soluble in cold water, and may be applied through any type of proportioner, spray or metered application.

Regular use of Country Club 28-7-14 will promote good growth and color with a minimum build-up of harmful soluble salts. Light frequent applications, depending upon individual conditions and feeding practices are best.

### Directions

**FOR PUTTING GREENS:** Use weekly, if desired, at the rate of 1 Lb. per 1,000 sq. ft. in 1/2 to 2 gallons of water. This amount will supply 1/4 LB. of nitrogen per application.

**FOR LAWNS, TEES, FAIRWAYS AND ATHLETIC FIELDS:** Use as required at the rate of 2 LBS. per 1,000 sq. ft. in 1/2 to 2 gallons of water. This amount will supply 1/2 LB. of nitrogen per application.

**NOTE:** When turfgrass is under stress because of drought, disease, hot weather, etc., it is advisable to increase the amount of water used. The amount of fertilizer, water and frequency of application should be determined and adjusted according to turfgrass requirements, prevailing conditions and feeding practices.

Country Club 28-7-14 is compatible with most commonly used pesticides and fungicides. Because types of chemicals and conditions vary widely, compatibility of each chemical used with the fertilizer solution should be determined before combining them.

### KEEP OUT OF REACH OF CHILDREN.

Fertilizer may cause irritation of eyes, nose, throat, and skin. In case of contact with skin or eyes, flush with plenty of water; for eyes get medical attention.

Use in accordance with recommendations of a qualified individual or institution, such as, but not limited to a certified crop advisor, agronomist, university crop extension publication, or apply according to recommendations in your approved nutrient management plan.

Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn, and sweep any product that lands on the driveway, sidewalk, or street back on to your lawn.

### WARRANTY
