GREENS KEEPER®

homogeneous
FERTILIZER

HOMOGENEOUS GRANULES

The secret of even distribution and quality turf growth

A homogeneous fertilizer provides a more uniform distribution of plant nutrients. Unlike a blend, every homogeneous particle contains all of the guaranteed nutrients - nitrogen, phosphorus, potash and iron, in the proper proportions. Your plants receive a complete feeding from every granule for optimum growth and color.

DIRECTIONS FOR USE

Apply any time during the turf growing season. For best results, do not apply in excessive heat.
