GUARANTEED ANALYSIS

Precautionary Statements

Do not use on residential turf.

SUGGESTED SPREADER SETTINGS

Do not apply more than 2 applications per year and do not use more than 0.375 lb ae clopyralid/1.125 lb ae triclopyr (312.5 lbs of this product) per acre per year.

Users should:

Apply this product only to turf and sweep any product that lands on driveways, sidewalks, or streets back onto the turfgrass.

NOTICE: This product contains the micronutrient iron. Iron may stain concrete surfaces and should not be applied on

Iron (Fe) 1.0%

1.6% Urea Nitrogen

6.6% Water Insoluble Nitrogen*
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-992-5994 for emergency.

User Safety Recommendations

Do not get in eyes or on clothing. Avoid contact with skin. Wear long-sleeved shirt and long pants, socks and shoes, protective eyewear.

First Aid

Do not use water on burning material. Remove contaminated clothing and shoes. Wash face, hands, and any other exposed skin with soap and water promptly after exposure. Consult a physician if symptoms persist.

Waste Disposal

Container Handling: Nonrefillable container. Do not reuse or refill this container. Triple rinse or pressure rinse containers before reuse. Do not contaminate water, food, or feed by storage or disposal. Non compatible solvents or dry cleaning chemicals are not recommended for cleaning this product. Ship in a suitable container according to the I.C.C. regulations. Do not burn. Do not incinerate.

NOTICE: This product contains the micronutrient iron. Iron may stain concrete surfaces and should not be applied on.

Local Turf Best Management Practices

Check with your county or city government to determine if there are local regulations for fertilizer use.

Information regarding the contents and levels of metals in this product is available on the Internet at: http://www.aapfco.org/metals.html

Established Cool Season Turfgrass

This product is a broad spectrum weed killer that will control broadleaf weeds in established cool season and warm season turfgrass.

Preplant Dormant Turfgrass

As a preplant treatment, apply 3.58 lbs per 1000 sq feet (156.46 lb per acre, equivalent to 13.6 lb of triclopyr) and 0.68 lbs of Nitrogen per 1000 sq ft when weeds are actively growing. Good soil moisture conditions are ideal for these operations. For the preplant application, follow the labeling for the herbicide used in the program. Follow all application and handling instructions for the herbicide.

Use equipment that will ensure uniform coverage and apply 3.58 lbs per 1000 sq feet (156.46 lb per acre, equivalent to 13.6 lb of triclopyr) and 0.68 lbs of Nitrogen per 1000 sq ft when weeds are actively growing. Good soil moisture conditions are ideal for these operations. For the preplant application, follow the labeling for the herbicide used in the program. Follow all application and handling instructions for the herbicide.

Apply at rates determined by local conditions. When applying this product as preplant, use the rates recommended for the herbicide used in the program. Follow all application and handling instructions for the herbicide.

Applications on Zoysiagrass

Do not apply this product directly to, or otherwise permit it to come into direct contact with, cotton, grapes, tobacco, vegetables, flowers, fruit or ornamental trees, or other nontarget broadleaf plants.

Entry Restrictions:

Do not use on residential turf. Turfgrass and lawn uses are restricted to non-residential sites.

Information Regarding Adverse Effects

It is impossible to eliminate all risks associated with use of this product. Plant injury, lack of performance, or other liability resulting from the use of this product is the responsibility of the user. The user assumes the responsibility for any plant damage or other liability resulting from the use of this product on species not listed on this label.

Usage Guidelines

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Read all Directions for Use before applying.

Do not apply this product directly to, or otherwise permit it to come into direct contact with, cotton, grapes, tobacco, vegetables, flowers, fruit or ornamental trees, or other nontarget broadleaf plants.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

See the complete label before using this product.

Do not wash off with water.

NOTICE:  This product contains the micronutrient iron.  Iron may stain concrete surfaces and should not be applied on concrete.

Iron may leach from the product, so do not apply on areas where leaching will contaminate the soil, groundwater or nearby surface waters.

Heavy metals: the product contains the micronutrient iron, which can stimulate the growth of some weeds.

Do not apply to turfgrass that is susceptible to any deficiency symptoms caused by iron or any other micronutrient.

At least 10 feet of distance should be maintained between the source of the product and all water bodies.

It is impossible to eliminate all risks associated with use of this product. Plant injury, lack of performance, or other negative outcome may occur while using this product as use of the product contrary to label instructions (including conditions noted on the label, such as unfavorable growing conditions to determine if the treatment is safe to the target species. The user assumes the responsibility for any plant damage or other liability resulting from the use of this product on species not listed on this label.

Do not seed, sod, or sprig after application. Delay until no sooner than 4 weeks after application. The user assumes the responsibility for any plant damage or other liability resulting from the use of this product on species not listed on this label.

For harder to control weeds, a repeat application in 4 to 6 weeks may be necessary.

For turfgrass injury, do not make additional applications within 4 weeks of a previous application. Apply to newly seeded turfgrass at a rate no less than 10 days after the final mowing. Do not apply this product directly to, or otherwise permit it to come into direct contact with, cotton, grapes, tobacco, vegetables, flowers, fruit or ornamental trees, or other nontarget broadleaf plants. This product contains iron that is toxic to some nontarget species. If the turfgrass seedlings do not tiller and develop an adequate secondary root system, it is possible for turfgrass injury to occur.

Turfgrass and lawn uses are restricted to non-residential sites. Do not use this product on residential turf. Turfgrass and lawn uses are restricted to non-residential sites.

When using this product, use equipment that will prevent the spread of contaminated grass clippings. Applicator must give notice to landowners/property managers to not use grass clippings for composting.

Do not contaminate water used for irrigation or domestic purposes.

Do not apply at greater than specified rates, especially under the branch spread (dripline) of trees.

Entry Restrictions:
Do not apply this product directly to, or otherwise permit it to come into direct contact with, cotton, grapes, tobacco, vegetables, flowers, fruit or ornamental trees, or other nontarget broadleaf plants.

Do not apply to exposed roots of shallow rooted trees and shrubs and allow to contact exposed suckers or injury may occur.

Do not apply to exposed roots of shallow rooted trees and shrubs and allow to contact exposed suckers or injury may occur.

Do not apply in or directly adjacent to bodies of water.

Do not apply over >2 inches of water.

Do not apply to or near water bodies.

Do not apply in windy conditions or if irrigation is expected within 3 days of application.

Application Restrictions:
Apply this product only as specified on this label.

Do not apply this product on golf course putting greens and tees.

Application shall be made to actively growing vegetation only. Plant growth stages described in the label are only intended to be used as guidelines.

Pre-emergent application is not recommended for emergence of weeds that have already emerged from the soil at time of application.

Do not apply this product directly to, or otherwise permit it to come into direct contact with, cotton, grapes, tobacco, vegetables, flowers, fruit or ornamental trees, or other nontarget broadleaf plants.

For turfgrass injury, do not make additional applications within 4 weeks of a previous application. Apply to newly seeded turfgrass at a rate no less than 10 days after the final mowing.
