Lebanon brand fertilizers are formulated for professional use on turf, including golf courses, sports fields, and landscapes. Specific application rates and frequencies are determined by the professional applicator based on local soils, regulations, and climate.

**WARNING**

**Hazard Statements**  
 May be harmful if inhaled repeatedly over prolonged periods.  
 Suspected of causing cancer by prolonged/repeated inhalation.

**Precautionary Statements**  
 Avoid breathing dust.  
 Use appropriate personal protection equipment as required to avoid breathing dust.  
 Dispose in accordance with all federal, state and local regulations.

**KEEP OUT OF REACH OF CHILDREN.**  
 Fertilizer may cause irritation of eyes, nose, throat, and skin. In case of contact with skin or eyes, flush with plenty of water; for eyes get medical attention.

Use in accordance with recommendations of a qualified individual or institution, such as, but not limited to a certified crop advisor, agronomist, university crop extension publication, or apply according to recommendations in your approved nutrient management plan.

Do not apply near water, storm drains or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn, and sweep any product that lands on the driveway, sidewalk, or street back on to your lawn.

**WARRANTY**

**NOTE** To the extent consistent with applicable law, Buyer assumes all responsibility for safety and performance if this product is not used according to the directions.

Information regarding the contents and levels of metals in this product is available on the Internet at:  
<http://www.regulatory-info-lebsea.com>

Application Rates and Frequencies in Canada: Follow your professional landscape management plan for your local course or area. A suggested application rate is 1 to 2.8 Kg for 100 m<sup>2</sup>, applied every 4 to 8 weeks during the local growing season.

**Application Rates:**  
 To feed at the rate of 0.43 kg Nitrogen (N) Equivalent to 3.5 kg of product per 100 sq. meters.

To feed at the rate of 0.24 kg Nitrogen (N) Equivalent to 1.0 kg of product per 100 sq. meters.
