User Safety Recommendations

User Safety Requirements

Personal Protective Equipment (PPE)

All loaders, applicators, and other handlers must wear:

• Eye protection
• Non-skid, non-spiked shoes

Some materials that are chemical-resistant to this product are natural rubber.

Lyons Chemical, Inc.

Manufactured in the U.S.A.

WARNING

Explosive dust may form when product is applied or otherwise handled. DO NOT use a compressed air gun to clean equipment, or use while anyone is nearby. DO NOT access or use equipment that has been contaminated with dust or is potentially explosive or flammable.

CAUTION

• For use only as directed.

PESTICIDE DISPOSAL:

Do not contaminate water, food, or feed by storage and disposal. Pesticide wastes are toxic. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law.

PESTICIDE STORAGE:

DO NOT USE IN OR AROUND HOMES, HOSPITALS, OR Convalescent Homes.

HOW MUCH TO APPLY

Apply 140.5 to 158.4 pounds (lb) of this product per acre of established turfgrass. Or the equivalent application rate is 3.23 to 3.64 pounds of product per 1,000 square feet (sq.ft.) of turfgrass.

Institutional sites are defined as turf areas around properties or facilities providing a service to public or private organizations; for example areas around hospitals, nursing homes, schools, museums, libraries, sport

This product is intended to be applied by noncommercial users, lawn care operators, and landscape personnel. Cool season grasses established in institutional, ornamental, and residential sites may be treated.

• Do not use this product on dichondra, carpetgrass, St. Augustinegrass, closely-mowed bentgrass putting greens, or turf containing desirable clovers.

DO NOT USE ON PLANTS EXPOSED TO HOEING, ORIFICE SPRAY, OR GROUND SPRAYING. FOR USE ONL Y AS DIRECTED.

HOW TO APPLY

Buckhorn Chickweed Dock Henbit Morningglory Plantain Sheep Sorrel Thistle

Apply the recommended application rate of this product in the morning when dew is present, or sprinkle or irrigate lightly (<1/4 inch) before application to provide maximum control. Applications should be approximately 30 days.

This product may be applied to newly seeded cool season turfgrass. Applications are recommended only after the third mowing or after the grass seedlings have tillered and have developed an adequate

This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water

Drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash

This pesticide is toxic to fish and aquatic invertebrates and may adversely affect non-target plants. To protect the environment, do not allow pesticide to enter or run off into storm drains,

• Do not use on plants exposed to hoeing, orifice spray, or ground spraying. FOR USE ONLY AS DIRECTED.

Lebanon Pro Brand

Fertilizer with TRIMEC® HERBICIDE
BROADLEAF WEED CONTROL

25-0-8

Controls Dandelion, Chickweed, Knotweed, Plantain, Henbit, and other broadleaf weeds as listed.

APPLICATION SUGGESTIONS:

HOW MUCH TO APPLY

For best control, apply this product to turfgrass to which weeds are established. Apply 140.5 to 158.4 pounds (lb) of this product per acre of established turfgrass. Or the equivalent application rate is 3.23 to 3.64 pounds of product per 1,000 square feet (sq.ft.) of turfgrass.

ENVIRONMENTAL HAZARDS

NOTE: For best control, apply this product to turfgrass that has not been recently treated with a non-selective herbicide such as clopyralid or triclopyr.

APPLY IF...

• Fall applications are recommended for the best control. However, this product can be applied any time broadleaf weeds are present and actively growing.

• cool season grasses established in institutional, ornamental, and residential sites may be treated. 

1. Spring and fall applications are recommended for the best control. However, this product can be applied any time broadleaf weeds are present and actively growing. 

2. Schedule applications in the morning when dew is present. Or sprinkle or irrigate lightly (<1/4 inch) before application to provide maximum control.

3. Supplemental applications of lawn fertilizer may be needed to achieve a minimum 1 pound nitrogen per 1,000 sq. ft.

APPLICATION TIPS:

• Do not enter or allow people (or pets) to enter the treated area until dusts have settled.

• To avoid injury, apply this product to the soil surface only. Do not use on areas that are or will be exposed to frequent foot traffic. Do not use on areas where a dense secondary root system. Do not use on or near exposed root systems or adventitious shoots (rhizomes) within the drip line of desirable trees and shrubs, since injury may result.

• Do not apply to areas within 3 feet (0.9 meter) of a well, septic tank, or any other water source. Do not apply to or near drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash 

FIRST AID:

If swallowed:

• Do not induce vomiting.

• Call a poison control center or doctor for treatment advice.

If skin exposed to this product:

• Wash thoroughly and change into clean clothing.

• Have person wash exposed skin areas with soap and water and thoroughly dry skin.

• Call a poison control center or doctor for treatment advice.

If inhaled:

• Move person to fresh air.

• Call a poison control center or doctor for treatment advice.

• Have person breathe fresh air, in a sitting position, while breathing comfortably.

• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.

If eye irritation:

• Have person rinse eyes open with cool, running water for 15 minutes. If able to do so, immediately hold a cloth under the closed eyelids while person rinses eyes. Wipe off any product from the eyelids. Then continue to wash eyes with cool, running water for 15 minutes.

• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.

• Have person rinse exposed eye areas with cool, running water for 15 minutes. If able to do so, immediately hold a cloth under the closed eyelids while person rinses eyes. Wipe off any product from the eyelids. Then continue to wash eyes with cool, running water for 15 minutes.

• Call a poison control center or doctor for treatment advice.
