2 - 4 week longer period of time (window of application) during which crabgrass control can be achieved.

•  This product provides postemergence control of listed broadleaf weeds.

•  This product provides preemergence control of listed broadleaf and grassy weeds, including crabgrass in established turfgrasses (including the large, smooth, and southern species) when applied prior to their germination.

•  When reseeding or overseeding, follow established cultural practices for seedbed preparation, seeding, irrigation and fertilization.

•  Some yellowing on solid (monoculture) stands of perennial ryegrass or tall fescue  may occur within two weeks of application of this product.  Any discoloration is transitory and will dissipate under adequate growing conditions.

Do not

•  Do not apply to centipedegrass during the period of winter dormancy. Apply to actively growing grass.

Use of this ... and 'Washington' may result in undesirable turfgrass injury.  Not all varieties of creeping bentgrass have been tested.

This product contains 2,4-D that has properties and characteristics associated with chemicals detected in groundwater.  Use of this product in locations where the water table is shallow, may result in groundwater contamination. Application around a cistern or well may result in

by State and local authorities, by burning.  If burned stay out of smoke.
