

Turf and Ornamental

Product Catalog

Rooted in Tradition, Growing Through Innovation™

LebanonTurf's advanced fertilizers, bionutritional products and grass seed have been helping turf professionals produce healthy turf and plants for more than 40 years. LebanonTurf is the only company that offers both microbiological components along with advanced controlled release fertilizer products.

Best of All Worlds®

LebanonTurf Technologies

LebanonTurf continues to explore and develop the industry's most advanced turf management technologies to deliver the ultimate in efficient, cost effective lawn care operations. Our technologies are recognized by landscapers and turf managers as proven applications of science and experience at work.

MESA is a unique nitrogen source that combines ammonium sulfate with methylene urea in a single, homogeneous particle. The result is an extremely efficient and controlled nitrogen source that produces consistent, dark green color without surge growth. Unlike coated nitrogen technologies, MESA does not lose its slow-release properties when cracked, chipped, crushed or broken. *MESA technology is found in our ProScape® brand.*

Meth-Ex 40 is a high activity methylene urea nitrogen source that provides extended turf feeding without the need for coatings. Microbial release allows Meth-Ex 40 to release nitrogen when the turf needs it the most. The result is a quick color response with no surge growth and a consistent and reliable long-term feeding schedule. *Meth-Ex 40 technology is found in our ProScape, Lebanon® Pro, and Woodace® brands.*

LSN (Lebanon Stabilized Nitrogen) ensures that nitrogen gets delivered to the turf and does not escape into the atmosphere through volatilization. LSN provides a cost effective source of nitrogen and offers an agronomic alternative to slow release nitrogen sources. Unlike straight urea, LSN does not need to be watered in immediately after application. *LSN is found in our Lebanon Pro brand.*

Chelating nutrients allows elements that would normally be tied up in soils to become available for plant uptake. This availability of nutrients to plants that are deficient or under stress is important to a plant's performance and health. *Chelation Technology is found in our ROOTS® brand.*

A healthy microbial environment in a soil profile is necessary for overall plant health. LebanonTurf's unique soil microbe complexes can enhance nutrition, improve soil physics or protect from disease. Microbes aren't just beneficial, they're essential. *Microbial Technology is found in our ROOTS brand.*

Mycorrhizal fungi expand rooting capabilities and allow the plants the ability to take in necessary water, nutrients and micronutrients that would otherwise not be available. Incorporating a diverse population of mycorrhizal fungi at planting time, increases plant performance and survival. *Mycorrhizal Technology is found in our ROOTS brand.*

Product Lines

Lebanon® Pro

The Lebanon Pro brand delivers cost-effective blended fertilizers and fertilizer control combination products. Lebanon Pro provides a practical and economical approach to performance and convenience in a wide range of lawn, landscape and general turf situations.

The ROOTS brand of biologically enhanced nutrients merge nature and technology to offer leading-edge solutions for turf and plant care. ROOTS products provide an all-in-one nutrient delivery system that feeds the plant while enhancing the biological life of the soil and plant ecosystem. Turf professionals, landscapers, growers, arborists, and nurseries trust ROOTS to provide consistent color response, improved turf density and enhanced root mass. ROOTS feature mycorrhizal fungi and naturally-occurring beneficial bacteria to put back into the soil what man-made processes have removed.

Rooted in Tradition, Growing Through Innovation™

LebanonTurf provides innovative and high performance products to the golf and landscape industries in North America and around the world. A division of Lebanon Seaboard Corporation (www.lebsea.com) LebanonTurf is an industry leader in producing advanced technology fertilizers, grass seed and biological products. Golf course superintendents, lawn care operators, professional landscapers and sports turf managers count on LebanonTurf brands: ProScape®, Lebanon® Pro, Country Club®, Penmulch®, ROOTS®, and Emerald Isle Solutions™ to help them be successful in their endeavors to create and maintain the best quality turf, plants and trees.

LebanonTurf stands out as the only company in its industry offering both microbiological components along with advanced controlled release fertilizer products delivered as part of an integrated systems approach to turf and plant care needs. In addition, the company's highly-rated grass seed products are available as mixes, blends and in straight varieties. With a network of more than 300 distributors, LebanonTurf products are available throughout the U.S. and in a growing number of international locations.

LebanonTurf has large modern distribution centers in Lebanon, PA and Danville, IL along with direct shipment capability from production facilities in New York, Indiana, Virginia and Oregon. The distribution efficiency of LebanonTurf is unmatched in the industry.
