

## Include PennMulch when HydroSeeding for Exceptional Results

### Case Study

**Application:** 9,000 sq. ft, slope 5H - 4H

**Equipment:** Turbo Turf 110 gallon unit

**Rate:** 1 x 40 lb. bag per 110 gallons

**Use:** 5 tanks, 5 bags of PennMulch used to cover 9,000 sq. ft.

**Notes from user:** Previous attempts to use Seed Aide Cover Grow had resulted in a clogged nozzle. With PennMulch there was no issue with clogging. After mixing the slurry for 5 minutes, everything was combined properly and it was ready to spread. 5 - 100 gallon batches in the Turbo Turf system were enough to cover the entire 9,000 square feet of bare ground.

### About PennMulch

For Thicker, Stronger, Healthier Turf....Faster include PennMulch Seed Starter containing a full rate of starter fertilizer when Hydroseeding. PennMulch stores moisture that is critical to successful germination and establishment. PennMulch also contains a tackifier that holds seeds, soil and mulch in place..

Available in: 40 lb. bag / 50 bags per pallet - #23-96109
